EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Non-elected claims 52-92 have been canceled.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: This application teaches an aqueous bath composition for the electroless deposition of copper comprising a soluble source of copper ions, a soluble source of molybdenum ions, a reducing agent comprising boron; wherein said composition is adapted to electrolessly produce a copper molybdenum deposit having a resistivity of less than 30 microhm-cm, and wherein said soluble source of molybdenum ions comprises molybdic acid monohydrate. The closest prior art or record is US Patent No. 3,650,777, issued to Schneble, Jr. et al., which teaches a copper plating bath comprising copper ions, molybdenum ions and a boron reducing agent but fails to teach or fairly suggest the use of molybdic acid monohydrate as the source of molybdenum ions as claimed by applicants. Accordingly, this application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
